How does it work?

LEARN MORE ABOUT THE TIRE TAG SYSTEM

A vehicle is parked in an unauthorized location creating a violation. No Parking Zone, Handicapped Parking, Fire Zone, Reserved/ Permit Parking.

Applicator "Tags" the vehicle with a device and decal, then enters the violation information into the platform.

Violator goes to TheTireTag.com, enters required information and pays with a credit or debit card through the online payment portal. Once the payment is received, a release code is provided to remove the device.

The device will need to be returned within 24 hours to any one of the indicated drop-boxes found nearby to avoid an additional fee.

- Save time and money
- Lower your liability
- Take a non-confrontational approach

The Tire Tag sets the standard for parking enforcement through consistency, efficiency and improving public perception by reducing confrontation.

PARKING ENFORCEMENT CHALLENGES / THE TIRE TAG SYSTEM BENEFITS

Confrontation:

The Tire Tag is removed and returned to a drop box by the violator after the payment is made, which eliminates the confrontation between the enforcement agent and the violator.

Labor Cost, Time Savings & Efficiency:

The enforcement agent "tags" the vehicle in less than 2 minutes. After the applicator tags the vehicle, they are done. This time savings and efficiency frees them to focus on security while also generating more revenue.

Device Limitations & Portability:

Applicators can easily transport dozens of Tire Tags which empowers them to cover more spaces and tag more vehicles. The Tire Tag is adjustable to fit almost any vehicle.

Ongoing Expenses:

The Tire Tag replaces any non-returned or non-functional devices at no additional charge.
